

Orientation Ice-Breaker Discussion

[Modify](#)[Remove](#)

Discussion Board Forum Instructions:

In an online class, it's always a good idea to start with something rather simple to help students build community. Let's try this:

Using your name as an acronym, or a nickname, write descriptive words to describe your teaching style or personality.

H - hard-working
E - energetic
R - relentless
M - methodical
A - ambitious
N - natural

You can see by the posting that I like to try new things and likes creating assignments and inventing different activities to enhance student success. Give it a try!

To make your posting, click on the discussion topic link above (Ice Breaker) and then choose Add a New Thread. Then, just type away. Be sure to come back and visit after posting your message to read the postings of your classmates. You are most welcome to make a comment or two.

Technical Assistance Center

[Modify](#)[Remove](#)

Having trouble finding links? Can't attach your Word documents? Leave your questions here - your classmates will appreciate it!

All participants should feel free to use this Discussion Board to help resolve their Blackboard technical issues. Users may post questions as well as offer comments and suggestions to other users who might be experiencing similar problems.

Faculty and Staff Lounge

[Modify](#)[Remove](#)

Feel free to use this forum to socialize a bit! Chat about your favorite movie, good books, upcoming vacations, hobbies, etc. Using good judgment as to what you post here is the only requirement.

Having a forum such as this is one way to build community in your course. It also encourages students to be focused in their postings and replies in other forums which may have a more academic nature.

Impact of technology on education

[Modify](#)[Remove](#)

Do you think that the impact of technology on education has been significant?
